

Durable Technology *Delicate Cut*

For over thirty years, precise, efficient and environmentally-safe Caroni lawnmowers continue to be the standard of excellence and technology in the field all over the world, improving their quality and safety in order to make work easier, faster and more productive. With the "Mulching and Recycle System" available on each model, grass and leaves don't need to be gathered and disposed of because they are turned into mulch, and again become part of the natural biological cycle, thus reducing time, cost and even the need for fertilization and watering. Designed and manufactured to always perform at their best, Caroni lawnmowers are guaranteed by strict measures through certifications ISO 9001 and ISO/TS 16949-2002.
